Lebanon War and Qana Carnage

The Egyptian Student Association in North America (ESANA) extends its full condemnation for the brazen Israeli aggression against innocent Lebanese civilians. Such acts have completely buried the peace process in the Middle East. In addition, we strictly condemn the atrocious Qana carnage that culminated in tens of women, children, and elderly victims. Such massacres are only committed by non-human monsters. We are also deeply shocked and sorrowed by the inability of the international community to stop the Israeli aggression while calling for freedom and human rights. We call for an immediate investigation and prosecution of the committers of this heinous crime, considered as a crime of war according to the international law.

ESANA would like to emphasize its full support for the Lebanese people and ask the international political powers to work for an immediate cease fire, allow for humanitarian aid to reach Lebanon, and work to achieve long-lasting peace based on a fair settlement.
